enterprise **Legal Case Management System**
helps you get decisions in favour of your bank.
LCMS
Keep an eye on all legal cases with real time
access to critical data and instant updates 24/7.

Key reasons e**LCMS** should be the choice of your bank

Latest web technology

Without installing any software on User PCs, Laptops or Mobiles, e**LCMS** helps you plan, initiate, assign and review all legal proceedings in courts by performing simple steps. It uses latest web technologies to provide a trouble free and easy to use user interface supported by strong and scalable backend and database.

Secure and real time user management

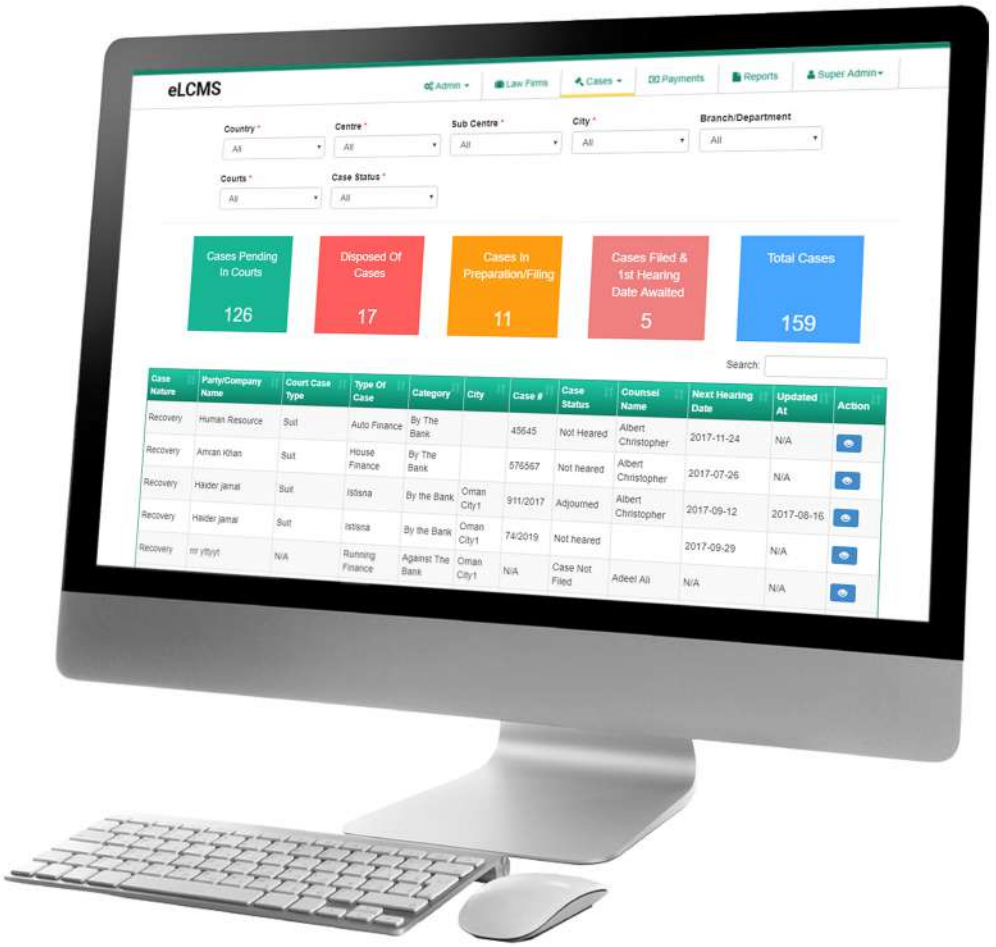
e**LCMS** is completely secured via encrypted transfer of data and deployed at your bank's data center. Only authorized users can access the system using valid user ID and Password. Everything is managed in real time and available for users as per their pre-assigned roles and rights.

Handshake with core banking system

e**LCMS** is built with capability to track all types of Recovery, Property and HR related cases. For all Non Performing Loans (NPLs) it interacts directly with Core Banking System. It populates NPL data and keeps it updated on daily basis giving complete visibility about status of defaults and helps you create checklist of required documents and prepare a case for filing in court.

Create and manage cases

Once a checklist is ready with relevant documents along with recommended external counsels an authorized user can initiate a case in e**LCMS** by entering first hearing date or court case number in the system. A detailed daily diary of the case is available to record date wise updates on the case up to the final verdict. System lets users change court or counsel anytime in any particular case.



Key reasons eLCMS should be the choice of your bank

Law firms & counsels

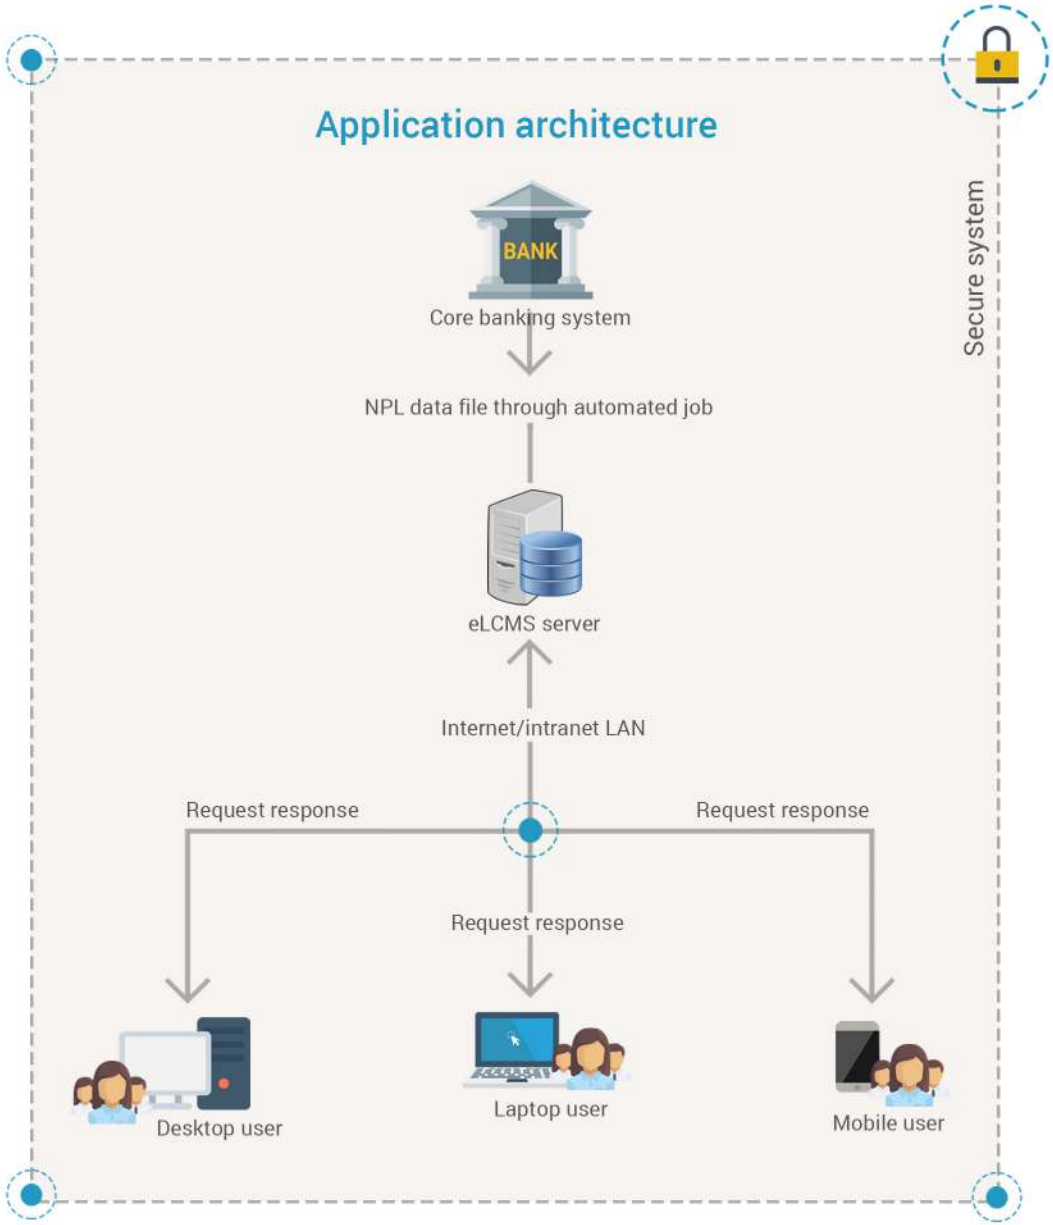
eLCMS stores unlimited law firms and their external counsels who work on bank's panel. System also tracks all payments made to counsels against each case. Counsels are notified for up-coming hearings via email and SMS notifications. Reports are available to see counsel performance in terms of case outcomes. Counsels if allowed can also directly update case progress on case diary section.

Reports

Key pre-built reports are part of eLCMS and are available to users with rights to view reports. These reports also include specific formats required as per guidelines from central bank and other regulators. Reports are shared via email notifications or can be viewed in the system based on different filters and date ranges and can be exported in Excel format.

Excellent support

The eLCMS is developed by a team with over 35 years of combine development experience in building web based software for large to medium size enterprises in USA, UK and Pakistan. While the system is designed to be fully self-service, a dedicated team of developers and support professionals supports all pre and post sales functions including requirement gathering, customizations, documentation, development, testing, deployment and onsite and offsite trainings.



Key Features of eLCMS

Multi country / region system hierarchy

- System maintains a hierarchy of managing all levels of Users and Data
- The flow of hierarchy is: Country, Center or Regions, Sub-Center, City and Branch / Departments
